

hello, i would like to voice my opposition to NAB's petition 04-160. i have been a satisfied subscriber of xm radio for 2 years. i am an overtheroad truck driver. although i know most of the roads i travel well, i am not always firmiliar with the local radio stations and which are best for traffic and weather. xm's instant traffic and weather provide me with te info i need to help make my drive efficient and safer. unlike some local stations that give reports geared toward local commuters, xm's reports are more for outoftowners. ie: on 780am in chicago they have traffic on the "8's" they give names of roads like the ike, stevenson, danryan, bishop-ford, which is fine for chicago people, but are meaningless to outoftowners.

XM
PROVIDES A BETTER PRODUCT, that's why i choose to buy it. how can xm steal free radio listeners when you have to suscribe to xm tohear it? we live in a free market society and xm has built a better mouse trap. competition makes things better for all of AMERICA.
